

## Harbourage at Braden River CDD

### November 2016 Landscape Report

Turf - Showing stress due to lack of rain but holding up ok.

Shrubs - overall in good health. We will continually remove declining Hawthorne.

Palms - we continually monitor the condition of the Washingtonian palms. No removals in Nov. Queens on SR 70, Medjools, Cabbages on Natalie way, and the Cabbages by the clubhouse were trimmed.

Irrigation - Tony has been working diligently on the pump/leak issue. We try to provide support when necessary.

Thank you and we look forward to working together to maintain a constantly evolving landscape.

Steve Sutton - Bloomings Landscape
