

Harbourage at Braden River CDD - Bloomings Landscape Report April 2016

**Turf** - overall healthy. Fertility to be applied may 18th. We will not be applying turf fertilizer again until October per regulatory moratorium. Weed control on going.

**Shrubs** - more Hawthorne removed from entry median and more still to be removed.

**Palms** - overall in good health. Washingtonian palms still appear in good health. We continually monitor their condition.

**Irrigation** - The irrigation has been reprogrammed to combat drought conditions.

Thank you and we will continue to work together to maintain a constantly evolving landscape.

Steve - Bloomings Landscape
